UFO-Files

There are many theories as to what "U.F.O.'s" are and where they come from. The theories include, but are not limited to (including aircraft, Mars and Venus). It isn't my intention to convince anyone what U.F.O.s are real, if aliens life forms exist or are visiting Earth.

~~1999 -Brewster New York United States-~~

A very large triangular shaped object with lights on the bottom which moved very slowly and silently! It seemed to be flying very low in the sky. We followed it in a vehicle for about 5 miles until we ran out of a road to run. It was heading from east to west from Danbury, C.T. to Carmel, before we had to let it go.

Athens - August - 2009.

A odd object suddenly appeared in the sky above the forest near Acropolis! Normally people say these things go fast, which they noticed only briefly till it shaved above the forest, seeming to look for something!

- A Terrible Crash - 2001 -

A big aeroplane crashed and 582 people with their children died... Many Americans believe that the aeroplane was under attack of U.F.O!

The Universe

Our Universe has got many stars, galaxies, comets and planets. Every night we see many stars on our sky that they must be the suns of other galaxies. In our galaxy we have got 9 planets. These planets are: Venus, Mercury, Mars, Earth, Saturn, Jupiter, Uranus, Pluto and Poseidon. The biggest planet of all is Jupiter and the smallest is Pluto. The most beautiful planet of all is Saturn because it has got 10.000 rings. Many spaceships have travelled around our galaxy and they have photographed many strange things, that we can't explain. The universe is beautiful and mysterious.

Science study many mysteries. One of them is Bermuda Triangle. This mystery is the most famous mystery in the world.

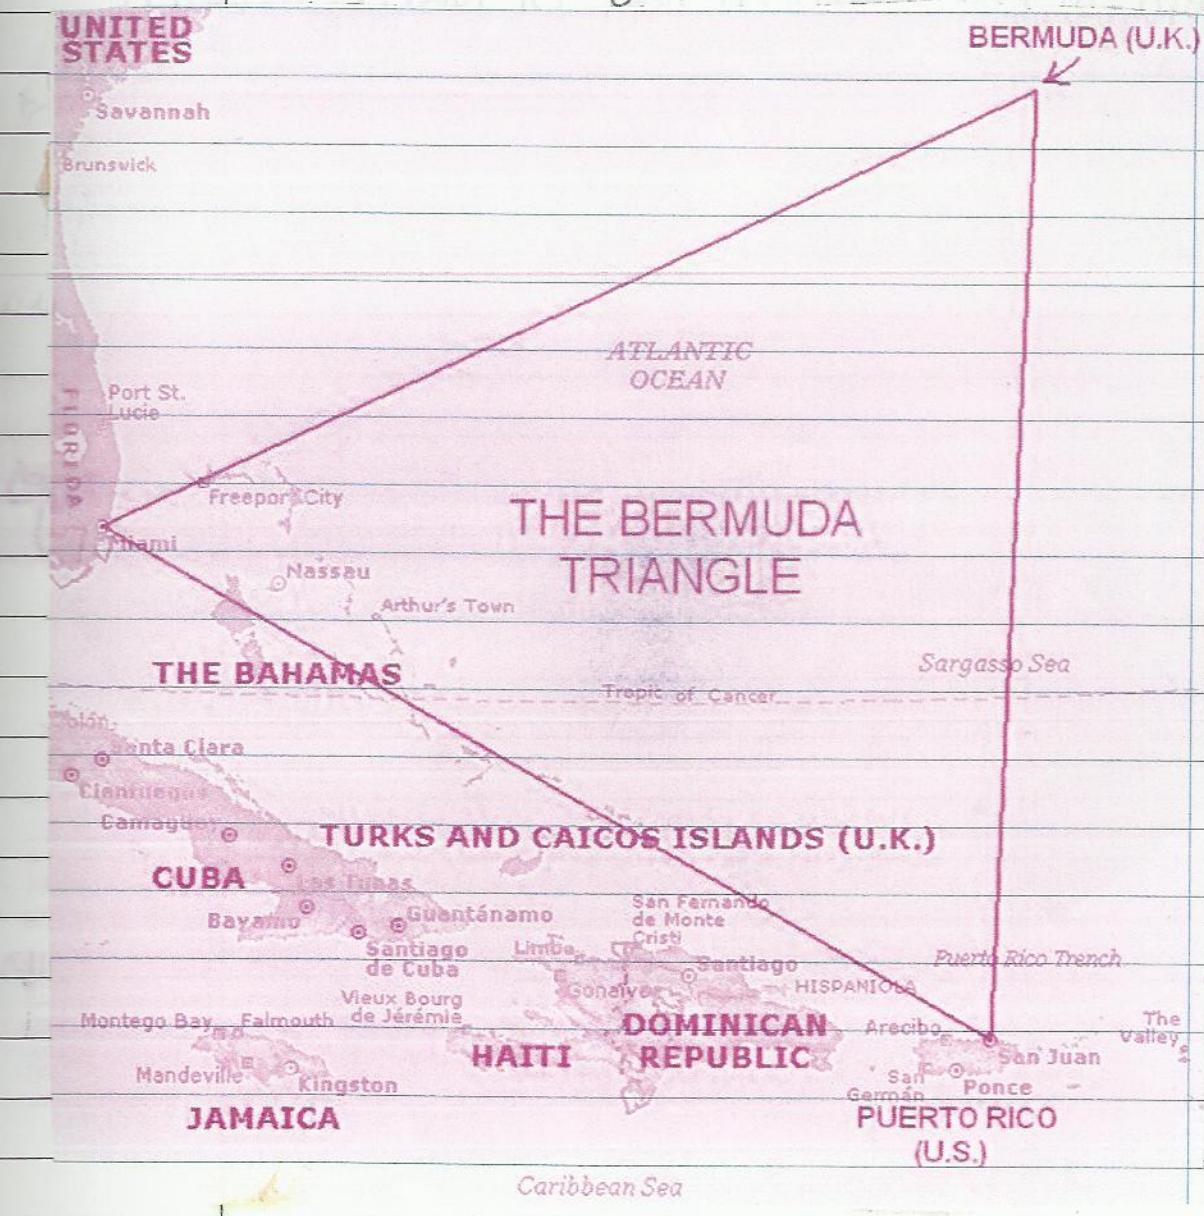

The Bermuda Triangle, also known as Devil's Triangle. It located in the western part of North Atlantic Ocean in which a number of airplanes and ships have mysteriously disappeared in a manner that cannot be explained by human error, piracy or natural disasters. Bermuda Triangle consists of Straits of Florida (Miami), the Bahamas and the entire Caribbean area.

Bermuda Triangle appeared in a September 16 1950. Then that year had disappeared many airplane and ships. Two years later "Fate" magazine published a short article by George X. Sand "Sea Mystery At Our Black Door".

Today this mystery hasn't discovered yet, but some scientists say that in this Triangle exist aliens and they disappear aircrafts, ships and naval vessels. Some other are supported that sometimes opens a huge gate and planes and ship transported in other dimension or others believe that this mystery is a huge lie.

Location

Canada is a country in North America, and it's one of the biggest countries in the world. Canada extends from the Atlantic Ocean to the Pacific and into the Arctic Ocean. Canada's area is one hundred times the area of Greece. Its coastline includes many kinds of beaches. It has many navigable rivers like Saint which is the passage between the lakes and the Atlantic Ocean. In the east Canada there are many plains. Ontario is the capital of Canada. There you can see the Niagara falls, which is one of the most beautiful places in Canada.

(Canada is also well known to the public for its lakes, like Superior & Ontario lake
(Here is Niagara falls ...)

History

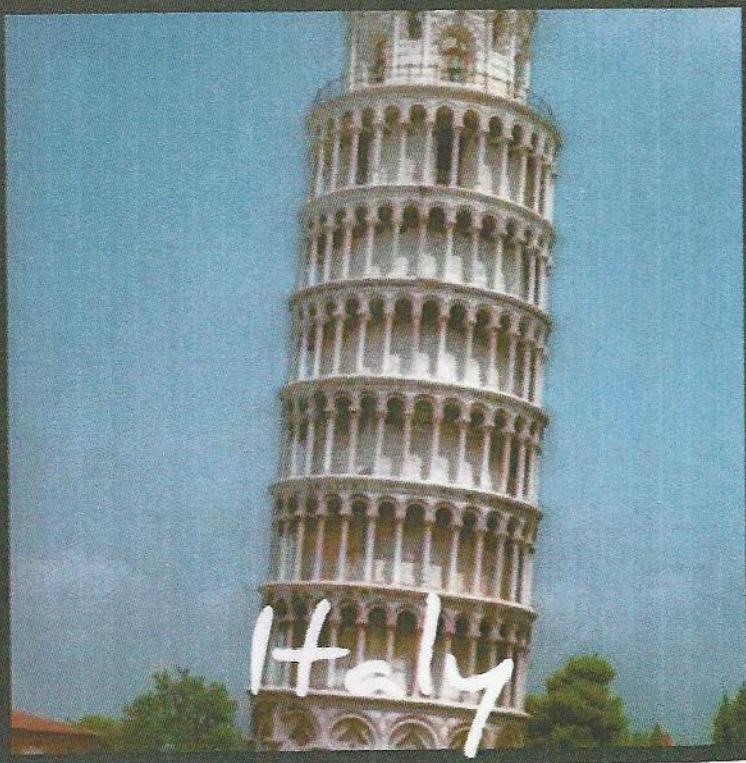

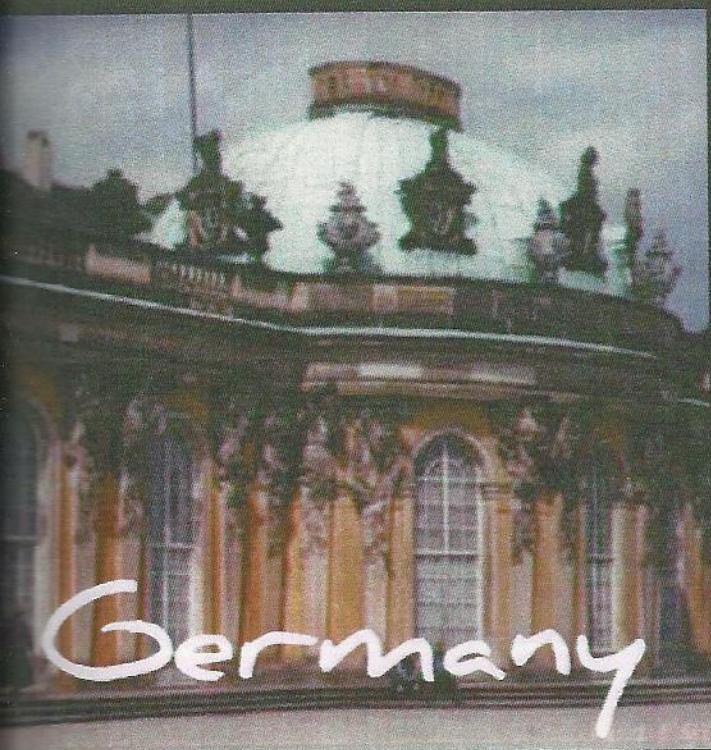

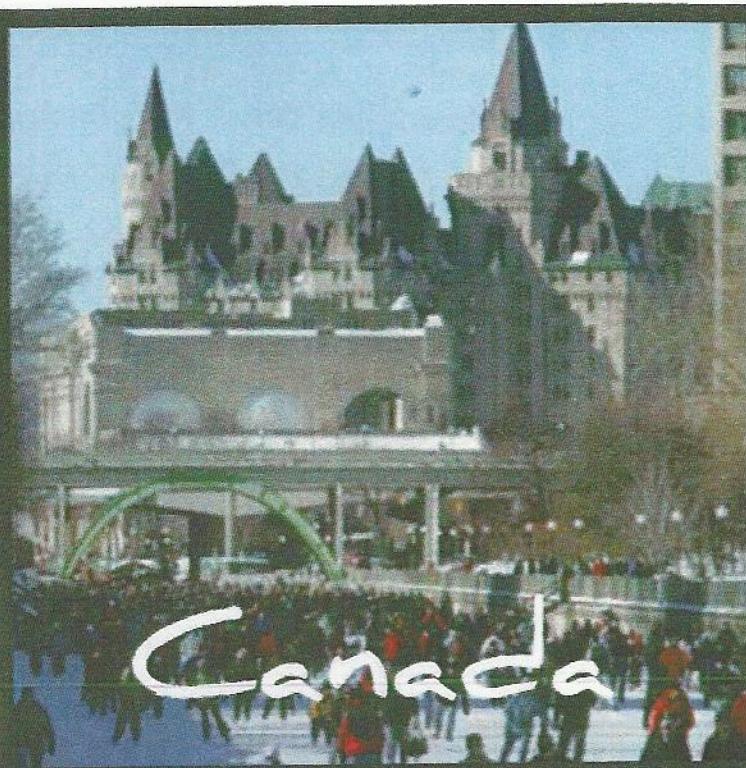

The name of the country probably comes from an Indian word «kanata» which means village. Another explanation is by a Spanish word «raia nadas» which means exactly here nothing. The first people who moved there were Indians and Inuit. Years later Europeans came there and lived with the Indians. Canadian is a peaceful people so there aren't any wars in Canadian history. Canadian used to solve their problems with agreements. In the 19th century they establish the Canadian Union so they could be protected by enemies without losing area.

Culture

From 20th century Canada has been developing thanks to the European people. After the 2nd World War Canadian economy and society bloomed. The Europeans, Asians and African people changed the image of the French Canada these years. Canada's languages are British and French.

HOW WOULD YOU LIKE YOUR E.S. TO BE?

The suggestions that follow are from children who go to a foreign language school and they explain to us how the foreign language school should be in their opinion

KATSIZ VASILIS

Mostly in schools we must remember that:

The conventions, the constitutions, the scientists and common ethics all agree that the child is a little human being Product of its natural parents and not their property. The adopted parents's choice or institution's responsibility, where it grows up, is that the child has to be the receiver of affection and care, in order to develop in freedom. It isn't object of dominating management or often exploitation.

CONSTANTINA ANASTASIADOU

- A good idea is to communicate in English all the time.
- There should be breaks so the students could relax and have a snack
- We should have more activities.

HELEN DOUKAKOU

- In my opinion in my English school we should go on daily excursions.
- We should use modern technology to do our lessons, such as PCs
- The use of mobile phones should not be allowed

either to students or to teachers.

MARIA PANTELIA

The ideal foreign language school for us should be somehow like that, where learning of a language wouldn't be only obligation but pleasure too for the students and we hope that one day all foreign languages schools will take our article as an example and make children's lives better.
